Nabil Haddad is a Professor at the Faculty of Public Health of the Lebanese University. He has a PhD in Parasitology from Champagne-Ardennes University (Reims, France) and postgraduate diplomas in Epidemiology from Bordeaux II University, and in Medical Entomology from Pasteur Institute-Paris.

Nabil Haddad teaches several courses of Biology and Microbiology for undergraduate students in the Laboratory Sciences department. Besides, he is the coordinator of the Master's program of Bio-Health at the Faculty of Public Health where he teaches advanced courses on Parasite-host interactions and on emergent arboviral diseases. For Two consecutive years, 2018 and 2019, he co-coordinated the HELP (**H**ealth **E**mergencies in **L**arge **P**opulations) course for the International Committee of the Red Cross that took place in Beirut.

Nabil Haddad is a researcher affiliated to the Laboratory of Immunology and Vector Borne Diseases at the Faculty of Public Health. His research is focused on the study of vectors and the epidemiology of vector-borne diseases in Lebanon and Syria. He lead numerous research projects with national (Lebanese University, CNRS) and international (WHO, NIAID, GEIS, Pasteur Institute,..) funds mainly on Leishmaniasis, Sand fly fever and mosquito-borne arboviral diseases. He obtained in 2013 the American scholarship of Fulbright.

Nabil Haddad is a consultant for the Lebanese Ministry of Health for arboviral diseases. In addition, he is a medical entomology expert for the WHO-EMRO region and a focal point for the "Global Outbreak Alert and Response Network" of the WHO. He is also a member of Euro-Mediterranean Networks MediLabSecure and VectorNet.
